CIVIL CONSTRUCTION

That was traditional business with diverse scale project: Head office (from Government, Ministries, Provinces and State owned Corporations); International standard 5-Star Hotel; Civil high-rise buildings; Schools; Hospitals; Tourist resorts...

To meet the increasing competitiveness in the construction market, VINA2 focused on the Research & Development and application of new technologies: the underground construction technology Top-Down, prestressed concrete structures, sliding formwork, flying formwork for floor beams, Hydraulic static pile driver, others new technologies and standards applied to the finishing works, ...

The successful in application of new technologies has brought exceptional performance in all aspects: speed up of construction schedule, engineering, quality, safety and sanitation, cost savings.

OFFICE

Some projects were performed in very difficult conditions and specific characteristics. Especially narrow construction site in city: very narrow conditions, restrictions on the supply of materials and equipment, high requirements on fire safety and environmental sanitation. However, VINA2 are very proud with a lot projects have been performed in central streets, there are many projects beautiful and sustainable over time forever...
